

# Rahwa Ghebremichael

FULL-STACK DEVELOPER

## Profile

Motivated Graduate from Code Your Future with experience developing responsive websites. Enthusiastic about learning new technologies and utilising them in real world scenarios. Over the last year, I've been tasked with creating static and dynamic websites using HTML, CSS, JavaScript and React. Now I am looking for a role as a software developer in an organisation where I could contribute to creating practical solutions to address pivotal and challenging problems.

## Employment History

### Code Your Future – Final Project, London

MARCH 2020 — AUG 2022

- Developed an e-learning app for customers who want the opportunity to study whenever and wherever they choose, at their own pace, and to assess their knowledge. (Link)
- Implemented the web app using technologies HTML, CSS, JavaScript, React, Git, SQL, Node.js, then deployed the front-end on Netlify and the back-end on Heroku.
- I worked as part of an agile team of four developers and learned how to work together (pair programming, code reviews, agile ceremonies).

### Math Tutor, Raei Progress Academy

MARCH 2020 — JUNE 2022

- Assisted students with their studies and marked their work.

### Maths Tutor, Enlighten Academy, London

JANUARY 2020 — MARCH 2020

- Assisted students with their class activities and homework and marked their work.

### Translator, Project Harar Charity, London

JANUARY 2020 — MAY 2021

- Translated Amharic and Tigrigna language to English

### Trainee IT Assistant, International University of East Africa, Kampala, Uganda

JUNE 2018 — NOVEMBER 2019

- Installed and configured computer network equipment.
- Assisted students with installation, configuration, and ongoing system hardware and software usability and maintained student computer labs.
- Troubleshoot computer labs networking and software maintenance.
- Monitored and maintained computer networks.
